WIRE SHELVING UNITS WITH STORAGE BINS

Same great features as the Kleton chrome wire shelving, but with the added convenience of heavy-duty storage bins.

- Adjustable chrome wire shelves
- Wire shelving resists corrosion and provides greater visibility to stored parts
- Wire shelves prevent build up of dust and dirt
- Bins are unaffected by oil, alkaline, and most acids
- Ideal in production or for parts storage

WIRE MESH PARTITIONS & ENCLOSURES

Rugged Kleton wire mesh partitions and enclosures provide maximum security at a minimal cost. It is ideal for the storage of tools, valuable inventory, hazardous materials and any area of your plant where restricted access is required.

Wire mesh panels permit full visibility and allow for unrestricted circulation of air, heat and light, providing an ideal storage facility.

- 2" x 2" x 10-gauge wire mesh
- 10-gauge frame (stiffeners included on all applicable sizes)
- Pre-drilled modular components allow for quick and easy installation
- Durable Kleton blue or safety yellow finish (Other colours available)

WIRE MESH PARTITION COMPONENTS

Everything necessary to create your own custom enclosure. Fast and easy assembly, multiple sizes available. Please follow these guidelines for determining the components required.

1. UNIVERSAL POSTS

A post must be placed at each end of every panel (or of every stack of panels). Be sure to calculate an extra 2" of overall wall length for each post added. When a post meets an existing wall, add one **KD115** wall bracket for proper support (fasteners are included with **KD115** to mount to post, not to wall).

Universal Posts

Blue Model No.	Yellow Model No.	Height	Wt. lbs.
KD053	KH860	8' 3"	22
KD046	KH922	10' 3"	27
KD050	KH923	12' 3"	32

2. PANELS

Whenever possible, stacking panels horizontally (one above the other) is more economical than placing them vertically (next to each other) - this is because fewer posts are required for wall support when panels are stacked.

Examples:

- For an 8' high partition, stack two **KD037** (8' x 4') panels horizontally
- For a 10' high partition, stack two **KD037** (8' x 4') and one **KD033** (8' x 2') panel horizontally
- For a 12' high partition, stack three **KD037** (8' x 4') panels horizontally

3. ADJUSTABLE FILLER PANELS

Adjustable filler panels fill in blank spots on the ends of wire mesh partitions to plug up potential security risks. Filler panels come in two sizes: 1' x 4' and 1' x 8' that slide over the ends of existing wire mesh sections. Bolt holes on the filler panels are separated per every inch and allow the filler panel to fill in a space between 6" and 10" wide. The holes line up with holes on the existing panel which are drilled in at the top and bottom to securely fasten the filler panel in two places.

FIXED MOUNTING SYSTEM

Model No.	Description
KF001	Complete 4' aluminum angle mount

CURTAIN PARTITIONS

- Curtain partitions screen, isolate, enclose and protect any area of any size
- Commonly used in welding and paint shops, but can be used anywhere
- Brackets made of 16-gauge steel and designed for wall or ceiling mount but can be self supported by floor stands
- Large selection of drape material can be utilized with any curtain

DESIGN YOUR OWN CURTAIN

Curtains - Take exact length of area of enclosure and add 10% fullness for proper draping. Then multiply length and height to obtain square footage. Curtains hemmed on top and two sides 2" pocket on bottom side. Brass grommets spaced every 12". Refer to model number for square footage cost of fabric required.

Track - Straight and curved. Straight track available in 5' and 10' lengths. Curved corners are 3' long with 2' radius welded splicer on each end included. When using a curved track, length is increased by 2', e.g. 8' straight track with a curve at each end overall = 12'.

Carriers - Since curtains are made to any length be sure to add one additional carrier to actual length of curtain ordered. For example every 10' of curtain is fabricated with 11 grommets on top side. Therefore 11 carriers are required. A double carrier should be used at the beginning of each curtain. Steel roller carriers are permanently lubricated enclosed bearings.

Clamps - Available for flush ceiling/beam mounting and floor mounting. Clamps can also be used as track splicers. All fasten with supplied Allen bolts. Order sufficient clamps to support track every 5'. When free standing uprights are required, be sure to specify clamps for fastening track on posts **KB032** (posts are required every 8'). Other custom heights on application.

Note: All posts should be lagged or welded to floor as required.
